¹ FTE: Full-time Equivalent. Take the total number of weekly hours worked by job category and divide by 40 hours to determine the total number of full time equivalent positions. Answer can be a decimal. Round answer to nearest tenth. Ex. 3 pharmacists, pharmacist 1 = 38 hours per week, Pharmacist 2 = 22 hours per week, Pharmacist 3 = 16 hours per week. Calculation = 38 + 22 + 16 = 76 ÷ 40 = 1.90 FTE.

Total Salaries should include any bonuses and/or draws from the owners.

³ Dispensing Activities should include any direct prescription dispensing activities. Direct prescription dispensing activities as defined in the Centers for Medicare & Medicaid Services final rule (2/1/2016) at §447.502 include the pharmacist time associated with ensuring that possession of the appropriate covered outpatient drug is transferred to a Medicaid beneficiary. This category includes, but is not limited to, a pharmacist's time in checking the computer for information about an individual's coverage, performing drug utilization review and preferred drug list review activities, measurement or mixing of the covered outpatient drug, filling the container, beneficiary counseling, physically providing the completed prescription to the Medicaid beneficiary, delivery, and special packaging.

⁴ Other Rx Related Duties include, but are not limited to, time spent maintaining the facility and equipment necessary to operate the pharmacy, third party reimbursement claims management, ordering and stocking prescription ingredients, taking inventory and maintaining prescription files.

Non Rx Related Duties should include any duties that are not related to the pharmacy department.

Totals for the Percent of Time Spent Breakdown. Columns A, B, and C must total 100%

Other Employee Benefits includes employee medical insurance, disability insurance, education assistance, etc.
